(As of Jun 2026)

EDUCATION

Old Dominion University

Ph.D. in Systems Engineering

Dissertation: Silo Trap: Detecting a Hidden Equilibria in Agent-Based Modeling & Simulation Using a Dual-Perspective Measurement Framework

Advisor: Dr. Andy J Collins

VA, USA

Continuing

Skolkovo Institute of Science and Technology (Dept. of Space Systems) -

Massachusetts Institute of Technology (Dept. of AeroAstro)

MS in Engineering (Space) Systems

Dissertation: A systems engineering approach to developing logistics architecture for the first crewed mission to Mars. ([Link 1](#), [Link 2](#))

Advisor: Dr. Anton Ivanov

Moscow, Russian Federation

- MA, USA

2020

Veer Surendra Sai University of Technology

B.Tech in Mechanical Engineering

Dissertation: Active Wireless Monitoring of Railway Tracks ([Link](#))

Advisor: Mr. J B Lakra

OD, India

2018

EXPERIENCE

Senior Research Engineer, Digital Twins, PlaSiV

- Deployed a synthetic data generator producing telemetry across all production lines, machines, and plants to power end-to-end digital-twin demonstrations for discrete manufacturing.
- Built the industry-first AI-driven MODAPTS calculator for manufacturing line design, defining a unified schema that combines planning inputs, SOP-derived MODAPTS standard motion times, and telemetry into one structured data model, and adapting a MODAPTS classifier that converts SOP text into standardized motion codes and time estimates.
- Designed a weighted-sum objective function across OEE, utilization, throughput, and cost per unit, and built a LangGraph agent loop that processes operator-proposed changes, runs discrete-event simulation scenarios, and returns the top three recommendations with composite-score deltas and KPI breakdowns.
- Building an optimization function that enables AI agents to orchestrate multiple tools and sub-agents across the manufacturing workflow.
- Architecting the first self-reinforcing, two-layered governance system, pairing a cybernetic self-governing layer with an external governing layer of AI agents, to deliver explainable and trustworthy AI for PlaSiV.
- Validated the integrated proof-of-concept on a synthetic electronics manufacturing dataset across three scenario types covering scheduling, process-parameter, and staffing changes.

CA, USA

May 2026 – Present

Doctoral Candidate, Old Dominion University

- Led multi-agent systems research, identifying two new invisible failure modes in behavioral dynamics, defining “silo trap” and “behavior contagion model” as the causal mechanism for hidden micro-macro perspective divergence in large-scale organizations and autonomous systems.
- Discovered causal failure modes in matching/recommendation systems (US National Resident Matching Program) by building a prestige-based bias model in Agent-Based Modeling, accepted at WinSim Conference, and recommendation for policy

VA, USA

Continuing

intervention based on a novel contagion triad framework.

- Built a multi-agent simulation platform in NetLogo, analyzing emergent behavior across 42,000+ agent interactions using time-homogeneous Markov chain (THMC) frameworks with von Neumann neighborhood interaction rules and 14 coalition-formation scales on HPC clusters.
- Proposed and designed Process-Oriented Digital Thread (PODT) architecture for the maritime maintenance systems within the US Department of Defense Digital Engineering Initiative.
- Developed Maritime Operational Scenario as a process applying Complex Adaptive Systems Method framework to accommodate dynamic requirement changes.
- Co-led, authored, and contributed to successful US federal proposals (Military Sealift Command), securing \$350K+ in funding.
- Developed a digital governance framework that enabled the Authoritative Source of Truths (ASTs) system to enhance decision-making under dynamic operational scenarios.

Co-Principal Investigator, US Department of Defense (MSC Division), Old Dominion University Research Foundation

VA, USA

2023 – 2024

- Coded NLP processing pipeline in Python using Word2vec and textblob libraries to analyze 160,000+ records.
- Implemented text pre-processing algorithms handling 687 domain-specific abbreviations and 1,550 misspellings.
- Developed a custom classification algorithm, achieving 92% accuracy on technical maintenance text data.
- Developed work-package analysis using Sentiment AI with Marine chief engineers, shore engineers, and SMEs.
- Created TF-IDF vectorization module to improve text similarity calculations in specialized maintenance terminology.
- Handled WBS and work packages from the Shipboard Automated Maintenance Management (SAMM) database of the MSC to identify sentiment injection nodes using the Knowledge Management System (KMS) framework.
- Conducted statistical analysis to validate 23% improvement in processing efficiency in model parameterization; secured \$146K in funding from the MSC.

Sustainable & ESG Analyst Intern, Office of State Senator of Virginia

VA, USA

2023

- Formulated carbon accountability metrics by analyzing data (Power BI); improved ESG reporting efficiency by 19%.
- Drafted circular economy proposals projected to secure \$4M and two industrial MoUs.
- Created simulation models for sustainability initiatives, generating \$98,000 in revenue within the first 2 months of implementation.
- Drafted Carbon Management Standards (CMS) based on 17 UN SDG goals, coherent with Verra VCS 4.7 and ACR 8.0.
- Optimized LLM-based (Gen AI) driver training module, enhancing workforce compliance and performance by 14.3%.

Systems Analyst, Urban Research Council [Volunteer]

NY, USA

Jul 2022 – Mar 2023

- Assisted a 5 member team to ingress digital twin for New York Smart City.
- Increased public engagement by ~ 16.4% on use of XR tools for smart living.
- Contributed to technical scripts expressing digital integration to smart city development.

Program Director, AATWRI Group (Advance Intelligence Division)

TN, India

Feb 2022 – Mar 2023

- Led a \$100K government-funded product launch, enhancing technology integration in aerospace operations.
- Implemented a framework for cloud-based operational execution, enhancing decision capabilities by ~18%.
- Managed a cross-functional team implementing ERP using an XR-based training module in compliance with OEM requirements.
- Engineered a digital recreational memory enhancement platform to capture and aid emotional availability in elderly people using XR.

Space Systems Engineer (Intern), German Orbital Systems**Berlin, Germany**

Jun 2019 – Jul 2019

- Led product development (CubeSat) launch into space using Shape Memory Alloy (SMA) with a reusable antenna deployment mechanism.
- Collaborated with cross-functional teams at German auto manufacturers to manufacture Shape Memory Alloy (SMA), implementing agile design to production methods, improving production efficiency by 4%.
- Launched a prototype (SmallSat) onboard a Falcon Heavy (SpaceX, USA) to the Low-Earth Orbit (LEO) to demonstrate the application. The SmallSat is still on the orbit (dated 2024).

Space Systems Engineer, Space Generation Advisory Council, United Nations ([Link](#))**Vienna, Austria**

Jun 2019 – Dec 2023

- Led a global team of 12 members to streamline international forums and authored 4 technical papers.
- Initiated open space forum, generated +7% engagement, recruited 12 members from 7 countries, increasing diversity.

Project Associate, Indian Institute of Technology Madras**TN, India**

Jun 2018 – Sep 2018

- Designed and prototyped single-box automatic cancer cell detector using SolidWorks and CNC.
- Performed ferrofluid-based impurity distillation on various fluids – fatty/non-fatty

Mechanical Systems Engineer (Intern) Indian Institute of Technology Roorkee**UK, India**

May 2017 – Jul 2017

- Optimized multi-point Macro Fiber Composites (MFC) patch distribution using spot mapping technique.
- Implemented fuzzy logic and random walk techniques for controlled feedback, improving target vibrations by 21%.

Industrial Engineer Trainee, Steel Authority of India Limited**WB, India**

May 2016 – Jun 2016

- Digitalized operational logbook for coke oven and sinter plant using OCR and Microsoft Suite, improving operational efficiency by over 23%.
- Proctored shift scheduling of the sinter plant, improving time backlog by 6%.

TEACHING/ TUTORING EXPERIENCE**Graduate Teaching Assistant, Old Dominion University****VA, USA**

2022 – 2023

- Graded and tutored for the coursework.
- Mentored and assisted 40+ student in each course category.
 - ENMA 515: Introduction to Systems Engineering
 - ENMA 661: Systems Engineering Design

Graduate Teaching Assistant, University of Texas at Arlington**TX, USA**

2021 – 2022

- Assisted professor in lecture material and graded for the coursework.
- Prepared rubrics, corrected exams and organized discussion sessions with 70+ students.
 - IE 4339: Production, Manufacturing, Entrepreneurship
 - IE 5314: Industrial Safety Engineering
 - DASC 5303: Data Science for Project Management

Graduate Assistant, Skolkovo Institute of Science and Technology**Moscow, Russian Federation**

2019 - 2020

- Mentored 5+ students on rocket building as a part of summer school.
- Taught rocket modeling and flow analysis to four cross-departmental teams of 5 members each as a part of collaboration project.

Undergraduate teaching volunteer, Veer Surendra Sai University of Technology**OD, India**

2015 - 2018

- Volunteered to teach under-privilege students with an aim to make them qualify the

state level board exams for class 11 and class 12 - three batches of 15 students each.

- Voluntarily taught freshman and sophomore university students (60 students of each year) extra lessons on rocket design and mechatronics.

AWARDED RESEARCH GRANT

- Title: Sentimental Artificial Intelligence for maintenance work order prioritization
 - Principal Investigator: Dr. Samuel Kovacic
 - Co-Principal Investigator(s): **Joshit Mohanty**, Cansu Yalim
 - Funding Agency: United States Department of Defense (Military Sealift Command), Federal Funding
 - Facilitator: CACI Inc., USA
 - Sponsored Amount: **\$146,336**

Sep 2023 – Sep 2024

PATENT

Method and system for reducing blind spots in vehicles' windscreen during turning. **Granted**
IPO 570997 (India)

Dec 2024

An autonomous fluid dispensing machine for agricultural and fire-fighting applications;
Filed IPO (India) Application No: 202411096231

Oct 2024

An autonomous ultraviolet mobile sanitizing robot; **Granted** IPO 383226 (India)

Oct 2021

- Uniquely designed for autonomous disinfection, globally recognized & awarded by (Top 2%) Micron Inc, USA.
- Devised industry 1st robot, ~\$10,000/unit with 96.7% disinfection efficiency in 10*15*12 ft room under <10 mins.

REVIEWER/ JUDGE

- Conferences:
 - Winter Simulation Conference 2026, INFORMS (2 papers)
 - 21st Annual System of Systems Engineering Conference (SoSE) (4 papers)
 - 19th Annual System of Systems Engineering Conference (SoSE) (2 Papers)
 - 59th Hawaii International Conference on System Sciences (HICSS) (1 Paper)
 - 75th Conference on Southern Association for College Student Affairs (SACSA) (5 proposals)
- Professional: MassChallenge Incubator, Boston May 2022
 - Selected as Panel Judge to judge a pool of 50 USA based startups.
 - Invited as a Mentor, to guide a pool of 10 USA based startups.

CONFERENCES ATTENDED

- Winter Simulation Conference 2026, Glasgow, Scotland Dec 2026
- Netlogo Conference 2026, USA Jun 2026
- 59th Hawaii International Conference on System Sciences (HICSS) 2026, USA Jan 2026
- 20th Annual System of Systems Engineering Conference, Albania Jun 2025
- II Graduate Student Government Association Research, Norfolk, USA Apr 2025
- 2025 IEEE International Conference on Data-Driven Social Change
- XIII International Scientific Conference on Development Trends In Space Propulsion Systems, The Łukasiewicz – Institute of Aviation, Warsaw, Poland Dec 2024
- 2024 International Annual Conference, American Society of Engineering Management, Virginia Beach, USA Nov 2024
- 6th International Conference on Artificial Intelligence and Applied Mathematics in Engineering 2024, Warsaw, Poland. Sep 2024
- Conference on Complex Systems 2023, Salvador, Brazil Oct 2023
- 26th Annual System and Mission Engineering Conference, (NDIA), Norfolk, USA Oct 2023
- 74th International Astronautical Congress, Baku, Azerbaijan Oct 2023
- Fleet Maintenance and Modernization Symposium 2023, San Diego, USA Sep 2023

- 71st International Astronautical Congress, Cyberspace Edition Oct 2020
- European Lunar Symposium 2020 May 2020
- 5th IAA Conference on University Satellite Missions and Workshop, Palazzo Rospigliosi, Rome, Italy Jan 2020
- 70th International Astronautical Congress, Washington, USA Oct 2019
- SpaceUp: Russian Edition, Moscow, Russian Federation May 2019
- 1st International Aerospace Silk Way Symposium, Moscow, Russian Federation Dec 2018

- 2nd India International Science Festival: Government of India – CSIR, New Delhi, India Dec 2016
- International Conference on Mechanical Aeronautical and Production Techniques, Mumbai, India Aug 2016
- IEEE – Think Nano, Indian Institute of Science – Airbus: Bangalore, India Apr 2016

ACHIEVEMENT

- Best Oral and Poster Presenter Award, GSGA Conference, ODU, USA 2025
- US National Level Entrepreneur Awardee: Black Stone Launchpad, USA 2021
- Runners Up: Human Exploration Rover Challenge, National Aeronautics and Space Administration (NASA K12), USA [Mentored] 2021
- Global Innovation Awardee: Micron Technology, USA 2020
- Grand Awardee: DRDO, Indian Air Force, Government of India, India 2020
- President Awardee: Exemplary contribution to Russian Scientific Community, Russian Federation, Skolkovo Foundation 2020
- Grand Awardee: Product Design Innovator, Dassault Systemes, France - India 2017
- Top 100 Innovators of India, Confederation of Indian Industry, India 2017
- Best Technical Innovation, Dept. of Science and Technology, Govt. of India, India 2016
- Runners Up: Best Presenter Award, Dept. of Science and Technology, Govt. of India, India 2016
- Young Astronomer Talent, Indian Space Research Organization - TATA Steel, India 2010
- Excellence in Education, University of New South Wales, Australia 2009
- Excellence in Environmental Protection Studies, Center for Wildlife and Environmental Studies, Ministry of Home Affairs, Govt. of India, India 2008

CERTIFICATION

- Agent Skills and Claude Code, Anthropic, USA 2026
- Business Intelligence, Google USA 2025
- Graduate Teaching Assistant: Graduate Teaching Assistantship Institute, Old Dominion University, USA 2024
- Industrial Control Systems Cyber Security, IIoT World, USA 2023
- Responsible Conduct of Research for Engineers, CITI Program, USA 2023
- Emprise Training on Shipboard Automated Maintenance Management, Military Sealift Command, US Defense – Emprise Corporation, USA 2023
- Certified Project Management, Google, USA 2022
- Quantum Computing Fundamentals, Indian Institute of Technology Roorkee, India 2020
- Certified SolidWorks Associate (CSWA), Dassault Systemes, France 2017

LEADERSHIP/ POSITIONS HELD

- Member, BCET Dean's Student Advisory Council, Old Dominion University Feb 2025 – Feb 2026
- President, American Society of Engineering Management Student Chapter Jan 2025 – Dec 2025
- Executive Advisor, Enheroes Global Energy, Malaysia Nov 2023 – Dec 2025
- Chief of Technology, Emerging Technologies, India Jun 2023 – Dec 2024
- Ally, International Student Advisory Board, Old Dominion University, USA Jan 2024 – Sep 2024
- Mentor, Global Monarch Club, Old Dominion University, USA Aug 2023 – Sep 2024
- Startup Mentor and Strategic Advisor, MassChallenge Incubator, USA Jun 2022 – May 2023
- Business Mentor, Verizon Incubator, USA Jun 2022 – Aug 2023
- Research Advisor, TodAers: African Space Research Group, Nigeria Nov 2020 – May 2022
- System Specialist, Open-Source Satellite, UK May 2021 – Dec 2021
- Domain Expert, Navonmesh Prasar Student Astronomy Team, India Sep 2020 – Apr 2021

- Co-Founder, VSSUT Space Innovation Center, India

Apr 2017 – Aug 2018

FELLOWSHIP

- Fellowship by the President of Skolkovo Foundation, Russian Federation 2019
- Fellowship by Dept. of Science and Technology, Govt. of Odisha, India 2014

RECORD

- Limca Book of Records, Hachette India ([Link](#)) 2019
 - First Student Body in India to develop and launch sounding rockets.
 - Undergraduate student-made sounding rockets capable of reaching over 2.14 Miles.
